

## Cornwall and the Isles of Scilly Methodist District

### Audio and Video Conferencing Using WiFi

There are several methods of connecting with each other online using audio or video conferencing. Two of the most popular are **Skype** and **Zoom**. You may also use Facetime from Apple, however this is only available to those using an Apple phone, iPad etc. Choose the one that suits your requirements best.

Skype and Zoom video calls can help you support your congregation at this difficult time. Perhaps you can use video calls to pray with others, hold a bible study or worship together.

The **Skype** App is already included with Windows 10 operating system, but if you do not have this then the App can be downloaded for free from:

<https://www.skype.com/en/>

Skype is a free resource you can use to send messages and have audio and video calls with groups of up to 50 people who also have the Skype App. You can create online communities.

To create a Zoom account, use the following link:

<https://zoom.us/signup>

Zoom is a very helpful tool that allows video conferencing and phone calls to other Zoom account holders. You can create online communities.
